

Technical Data Sheet

EXTERIOR SUPPER FILLER

APPLICATIONS

- Fills cracks and holes up to 10 cm in brick, stone, wood, fibre cement, render, concrete, polystyrene, plasterboard, plaster and stucco
- Ideal for over-head applications (non-slump formula)
- Excellent adhesion to all cementitious surfaces
- Suitable for interior and exterior applications
- Not suitable for use on damp surfaces

PRODUCT PROPERTIES

- Ready to use
- Will not shrink or sag
- Easy to sand
- Ultra tough: accepts nails, screws and is drillable
- Paintable after approx. 2 – 3 hours (5 cm layer at 20°C) with a water-based paint
- If required, sandable after 24 hours. **Sanding before proper drying will cause sandpaper clogging and tearing of the finish.**
- Accepts oil-based paints after 24 hours
- Maximum layer thickness: 5 cm
- Maximum depth: 10 cm
- Colour: Light Grey
- Finish: Slightly Coarse

INSTRUCTIONS FOR USE

- Substrate must be clean, dry, dust and grease free.
- Remove all loose material.
- Mix well before use.
- Product can be used directly from the pot.
- Apply the product firmly in to the hole with a filling knife.
- For a super smooth result, finish with a damp filling knife.
- For holes deeper than 5 cm, apply in layers, with sufficient drying time between the layers.
- Replace cover sheet after use and ensure lid is properly closed.
- Once dry sand to a smooth finish.
- Clean tools with warm water immediately after use.
