

8W5

Technical Data Sheet

Product Group

Primer Surfacer

Characteristics

Product Information

- A two-component polyurethane primer surfacer providing excellent filling properties.
- May be applied to aerospace aluminum and composite substrates to fill and smooth surface irregularities in combination with AkzoNobel Aerospace Coatings specification primers, conductive coatings and topcoats.

Components

Curing Solution Thinner Base material 8W5 Curing Solution 50C3

Thinner 66C20 or 66C28

Specifications

Qualified Product List Avic Aviation AMMS2514

Boeing BAC 5837 (Note: BAC 5837 - use as pinhole filler only),

BAC 5322, TY I&II, CL 2, BMS 10-143, TY I CL A, GR A

Comac CMS-CT-904
EADS (CASA) Z12.216
Lear Fan Corp, (US) LMS 5002A
MTU Aero Engines AG MTS 1681
Northrop Grumman GC130CS1
Pratt & Whitney PWA36014

Product specifications are constantly changing, to ensure the most accurate information regarding specifications, please check our online qualified product list (QPL) at aerospace.akzonobel.com/products.

Surface Conditions

Cleaning

Surface pretreatment is an essential part of the painting process.

- Aluminum: Follow specification requirements for pretreatment and primer application.
- Apply 8W5 surfacer to fill surface irregularities prior to the subsequent steps in the coating process.
- Laminates: Clean thoroughly with non-residual solvent.
- Fill laminate "pinholes" with Static Conditioner Filler 28C1 in accordance with directions, before applying 8W5 surfacer.

Instruction for Use

Mixing Ratio (volume)

8W5 4 parts 50C3 1 part Thinner *2 parts

- Stir or Shake until all pigment is uniformly dispersed before adding curing solution.
- Stir the catalyzed mixture thoroughly.

*Thinner 66C20 or 66C28 for spray consistency. Do not exceed 3 parts thinner maximum by volume.

Induction Time

15 minutes.

Initial Spraying Viscosity (25°C/77°F) 60 - 74 seconds ISO-Cup 4

24 - 34 seconds Signature Zahn-Cup #2

25 - 35 seconds Ford Cup #4

Note

Viscosity measurements are provided as guidelines only and are not to be used as quality control parameters. Certified information is provided by certification documentation available on request.

Pot life (25°C/77°F) 6 hours.

Dry Film Thickness (DFT) As required

Application Recommendations

Conditions

Temperature:

15 - 35°C

59 - 95°F

Relative Humidity:

35 - 75%

Note

8W5 may be applied in conditions outside the limits shown above. Care must be exercised to ensure a satisfactory result. Please contact your local AkzoNobel Aerospace Coatings representative to determine the appropriate application techniques when environmental conditions fall outside of the recommended range

Equipment

Spray gun type Nozzle orifice Product flow Dynamic air

pressure at gun-

inlet*

Air	1.8 mm nozzle orifice	N/A	N/A
HVLP	1.4 mm nozzle orifice	N/A	N/A
Air Assisted, Electrostatic	.33 mm nozzle orifice	N/A	N/A

Number of Coats Spray on one or more coats as required for adequate filling of imperfections in substrate. Allow final coat to stand 4-6 hours, sand with fine paper, then topcoat with selected AkzoNobel Aerospace Coatings topcoat.

Cleaning of Equipment

MEK, C28/15

Storage

Store the product dry and at a temperature between 5 and 38°C / 41 and 100°F per AkzoNobel Aerospace Coatings specification. Store in the original unopened containers. Storage temperature may vary per OEM specification requirements. Refer to container label for specific storage life information.

Shelf life 5 - 38°C (41 - 100°F) 18 months per AkzoNobel Aerospace Coatings commercial specification. For 8W5 and 50C3. 24 months for 66C20 and 66C28. Shelf life may vary due to OEM specification requirements. Refer to container label for specific shelf life information.

Safety Precautions

Comply with all local safety, disposal and transportation regulations. Check the Material Safety Data Sheet (MSDS) and label of the individual products carefully before using the products. The MSDS's are available on request.

Issue date: November 2022 (supersedes October 2020) - FOR PROFESSIONAL USE ONLY

IMPORTANT NOTE The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given is subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development.
