

Basecoat Interior Binders

Advanced interior coatings technology developed for the sign industry

Grip-Gard Basecoat Interior Binders provide the option of converting Grip-Gard Basecoat toners into extremely fast-drying interior coatings without the need for a clearcoat. Grip-Gard Interior Binders are available in two gloss levels which can be blended to achieve various gloss levels based upon the gloss level required.

The Grip-Gard Interior System uses the same toners, hardeners and reducers as the Grip-Gard Basecoat System, eliminating the need for additional inventory. This system also allows for a tremendous range of solid, metallic and pearl colors that can be directly sprayed onto ADA-compliant photopolymer, as well as most common plastics and properly-primed metal surfaces. The Grip-Gard Interior System has excellent color fastness and mar resistance, and provides excellent resistance to common household cleaners.

- Uses the same toners, hardeners and reducers as the Grip-Gard Basecoat System
- Delivers a wide color and gloss range with no clearcoat required
- Provides extremely fast dry times

Quick Facts

Item Number:	
Basecoat Interior Satin Binder 90:	572016 (1GL)
Basecoat Interior Matte Binder 91:	397617 (1L)
VOC (RTS):	
5.3 to 6.0 – Dependent on formula and binder selection	
Mix Ratio:	
100:50, then 100:50	
Step 1: 100 parts Grip-Gard Basecoat toner formula to 50 parts of the Interior Binder (or blend of interior binders for different gloss levels).	
Step 2: 100 parts of the previous mixture to 50 parts of the Grip-Gard Basecoat Translucent Reducer.	
Film Thickness:	
1.0-1.2 per coat	
Theoretical Coverage:	
298 sq ft/gal RTS	
Shelf Life:	
1 year
